Rules concerning Husbandry,

WHEN you would Plant or Graft, consider where the wind bloweth, if it be in the South, it is very good for that purpose, but if it be North or East, it is not good.

It is good to Plant or graft generally the Moone increasing in these signes, *Taurus*, or *Aquarius* in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moone is in *Taurus*, *Leo*, or *Aquarius*.

Cut timber to have it sound, in *December*, or *January*, in the wane of the Moone in *Aquarius* or *Pisces*.

Prune trees and pull off the moss in the moneth of *Febr.*

Plash hedges and Lop trees for sewell, that the heads may be sooner grow again, when the Moone is in *Aries*, or *Libra*, and in her increase.

Set young Quicklets, from *September* to *March*.

Remove young trees in the last quart. of the ☾, when she is in ♋, ♎, ♏; and in these months *Septemb.* *Novemb.* *Febr.*

Set Vines in *February*, *March* or *September*, specially the Moone in *Aries*, *Libra*, *Scorpio*, in her increase.

Set Rose trees in the midt of *February*, the ☾ increasing.

Cut or prune trees in *March* or *April*, the Moone in *Taurus*, *Virgo* or *Capricorne*.

Gather fruit, as Apples, Pears, and the like, at the full ☾, in the after-noon, the weather being faire and dry.

Cut downe Hay presently after the full of the Moone.

Dung ground to prevent growing of weeds, the Moone decreasing.

Sow Carrer-seeds about the end of *February* or the beginning of *March*, the Moone increasing. Also, sow Onions and Leekes in *February* or *March*, at the wane of the Moone.

Sow Cucumbers and Millions in *February*, *March* or *June*, in a hot and faire day.

Sow Parsly, Fennel, and Annist, in *February* or *March* at the full of the Moone.

Fly, 1659.

Sow Marjorum, Violets, Time, Rosemary and Lavender, in February, March or April, in the increase of the moone.

Sow Gilliflowers and Wall-flowers in March or April, in the old of the moone.

Sow Hyssop and Savory in March when the moone is old.

Sow double Marigolds in February or March, in the increase of the moone.

Sheare Sheepe at the increase of the moone.

The best time to Geld cattel the Moone being in Aries Sagitarius or Capricorne.

Of Blood-letting, and some other Physicall Observations.

In Youth let blood from the change to the first quarter, in middle age, from the first quarter to the full. In Elder years from the full to the last quarter. In old age, from the last quarter to the change.

We know, that under the age of 14. and above the age of 56. is not good to bleed at all.

Again, in the Canicular or Dog dayes, it is very hurtfull to take any blood at all, unless there be great need, and indeed necessity both no law: therefore in such a case, the disease being desperate, the cure must be adventured.

Take a purgation when the Moone is in Trine, or Sextile aspect, with Venus decreasing in any of these three signs, Cancer, Scorpio, or Pisces, and it will be sure to worke the better, because when a most Planet, in a most Raigne hath such an aspect, the humours in the body are then stirred up and down, and so the better purged out, wherefore in this case, it cannot be amiss to prepare humours by something that is laxative: and let this be done whilst the Moone is either in Gemini, Libra, or Aquarius.

Take a vomit that it may worke thoroughly, when the Moone is in Aries, Cancer, or Capricorne: and know that the aspects of the Moone with Saturn, or Mars, or the Moone in Leo, ought to be esteemed in the taking of medicines.

Finally, it necessarily urge no list, these observations are expedient: for it is a plaine truth, that the change of weather upon different aspects, doth greatly change and alter many bodies.
